TechSource and Pro2Serve Awarded a Professional Technical Support Services Contract for the NNSA Mixed Oxide (MOX) Fuel Fabrication Facility

Los Alamos, NM. TechSource is pleased to announce the TechSource and Pro2Serve team has been awarded a Technical Support Services contract for support to the NNSA Mixed Oxide (MOX) Fuel Fabrication Facility Project located at the Savannah River Site in Aiken, South Carolina.

The TechSource team will support the MOX Federal Project Director and related NNSA project offices. The TechSource team will provide technical and administrative support in the areas of project controls, construction, engineering, security, quality assurance, conduct of operations, nuclear safety and security, business/human capital management, and contract management.

Transition of work from incumbent Navarro will start September 16, 2015 with the full contract effort beginning October 1, 2015. The terms of this award are 19 million dollars over a 5-year period.

Donald Trost, TechSource Executive Vice President and the Director of Washington D.C. Operations, shared his commitment to providing unmatched technical expertise to the project, "This win and transition of work clearly demonstrates TechSource's and Pro2Serve's ability to leverage our extensive expertise as leaders in the MOX field. Our collective expertise will serve as the basis for ensuring that the NNSA Mixed Oxide (MOX) Fuel Fabrication Facility Project achieves its mission critical activities in the most timely and cost-effective manner. We are pleased to be recognized for our leadership, extensive knowledge, and distinctive expertise in this critical arena."

Founded in 1997, TechSource is comprised of over 500 senior level engineers, scientists, and leaders from the national Laboratories, Federal technology programs, and the nuclear industry. TechSource is recognized as an independent, qualified expert whose advice and products are accepted as authoritative and that has a unique and effective capacity to bridge technical and program requirements.
