TechSource Awarded Independent Project Reviews and Assessments (IPR) Contract from the Office of Enterprise Project Management

Los Alamos, NM. TechSource is pleased to announce it has been awarded a three year, 4.41M dollar contract to provide technical project review and assessment services to National Nuclear Security Administration's (NNSA), Office of Enterprise Project Management (NA-APM-20). The contract was awarded based on the TechSource Team's advanced knowledge and successful application of project and construction management practices as well as on its leadership in fields relevant to nuclear facilities engineering and project management disciplines important to the design, construction, and operations of nuclear projects.

NA-APM-20 serves as the single point of contact for all NNSA project management issues and provides independent perspectives on project management development and execution for NNSA Acquisition Executives. TechSource's subject matter experts will support NA-APM-20's efforts to improve NNSA's project performance and success rate by providing unbiased on-demand project assessment and review services. Independent Project Reviews (IPR) services will include: supporting NNSA during performance of IPR assessments and Independent Project Peer Reviews; evaluating planning and construction cost, schedule, and risk management and acquisition; and providing environmental safety and health and quality assurance review expertise; and preparing, assisting and documenting assessments of NNSA projects.

TechSource Vice President James Rhone shared how honored TechSource is to have been selected to continue to provide advice and support to the Office of Enterprise Project Management. "Since October 2003, we have assisted DOE/NNSA with well over 100 reviews at every NNSA site. It is a privilege to participate in the Nation's security effort by assisting DOE/NNSA execute their critical projects and continue its transformation from a "20th Century Cold War Nuclear Complex into a 21st Century Nuclear Security Enterprise."

Founded in 1997, TechSource is comprised of over 500 senior level engineers, scientists, and leaders from the national laboratories, Federal technology programs, and the nuclear industry. TechSource is recognized as an independent, qualified expert whose advice and products uniquely and effectively bridge technical and programmatic requirements.

For more information about this contract please contact James Rhone at jrhone@techsource-inc.com. To learn more about TechSource please visit techsource-inc.com.

About TechSource, Inc.

TechSource is a nationally recognized engineering and consulting firm specializing in the management and technical delivery of large-scale nuclear and high technology projects. The company provides direct access to more than 600 experts and industry leaders in systems integration, nuclear sciences, non-proliferation technologies, accelerator physics, and systems engineering arenas. TechSource's outstanding technical service has allowed the company to achieve a client retention rate of over 95 percent.
